

Wall Guards

Don't get caught off guard

No matter what drying solution you've put in place, users can mess your pristine restroom environment. Just a few drops leave hard-to-remove spots on your walls.

Our wall guards shield your environment from water stains and wipe away clean for easy maintenance. They're designed to enhance sanitation and protect your walls. Plus, they add a sleek, modern look and feel to complement your restroom. You can pick from stainless steel or antimicrobial white plastic.

Need a simpler solution for surface-mounted ADA compliance? Choose our ADA wall guard with a new or existing surface-mounted dryer. It's a cost-effective, straightforward alternative to recessing dryers with accessory kits, and serves double duty to protect your walls. Simply, install the ADA wall guard below any non-compliant hand dryer to bring those installations into compliance.

Whether you want to cut down on paper, keep your restroom clean, or ensure compliance, you're doing your part to improve your environment and ours. And we're here to help. World Dryer puts your goals and visionary products within arm's reach.
